**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 10 and 25 - 32, interactive video distribution systems have a diverse device coupled to the receiver, classified in class 725, subclass 133.
- II. Claims 11 - 24, drawn to client/server processing of distributed data via the Internet, classified in class 709, subclass 203.
- III. Claims 33 - 40, drawn to distribution of advertising, classified in class 709, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as distribution of printable data to a settop box in an interactive video distribution system. Invention II has a separate utility such as distribution of data via a computer network (i.e. Internet). Invention III has a separate utility like the distribution of advertising. See MPEP § 806.05(d).
